EXAMINER'S AMENDMENT

1. An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it **MUST** be submitted no later than the payment of the issue fee.

The application has been amended as follows:

2. This application is in condition for allowance except for the presence of claims 17-22 directed to an invention non-elected without traverse. Accordingly, claims 17-22 have been cancelled.

3. The following is an examiner's statement of reasons for allowance:

4. Claim 1 recites a second pressing means which includes a pressure applying means and a balloon for transmitting a pressure of the pressure applying means to the transfer die. The combination of Masahito, Seary, and Fujita applied above teach an electromagnetic pressing means as the first pressing means but do not disclose or suggest the use of a balloon as a secondary pressing device. Mineo et al. (JP 02-192045, of record) and Hayashi et al. (PGPub 2003/0231578) disclose balloons used as pressing devices; however, such devices are employed as the singular pressing means and there is no suggestion to combine with a secondary magnetic pressing means. The prior art cited does not teach or suggest a pattern transfer apparatus which employs a magnetic pressing means comprising two or more electromagnets and a balloon-based pressing means.
